

Anders Thielen

Personal Bio

I love to work and am thrilled about every job. My experience in two professional plays and a professional opera proves that I am hard working and professional. I am outgoing, talkative, curious and very smart. When I am not acting, I can be found loving my beagles, doing science experiments, engineering kits, 3D printing or skiing. I have a passion for life with wide interests including computers and technology, loose leaf tea, and animals.
